

USING SCISSORS SAFELY

Scissors are useful for cutting thinner pieces of cardboard or to cut the supplied string.

Safety points:

- Only use blunt ended safety scissors.
- There are right handed and left handed scissors. Use the correct type.
- Do not try to cut materials that are too hard or thick with scissors
- Make sure your fingers or your team mates' fingers are out of the way when cutting.
- Keep your work area clean and tidy.
